

# SKINLAB

A letter from SkinLab's Founder:

We have missed you these past few months and are looking forward to providing our tailored, non-invasive beauty services again very soon.

While SkinLab has always maintained the highest standards of cleanliness, we are reopening with additional measures designed in conjunction with specific safety protocols. Please note that treatment rooms and devices have always been thoroughly disinfected after each use. We will continue these safety measures along with the additional precautions below.

We look forward to welcoming you back at SkinLab soon!

## **SkinLab's COVID-19 Precautions**

- Reception is performed virtually and we encourage you to book appointments through the [online booking tool](#). If you prefer to speak with someone directly, please call 310-994-4669.
- All clients will be assisted by a virtual-patient-care coordinator.
- We have reduced the number of appointments to allow for distancing and additional disinfecting of the office and treatment areas.
- Only one client and one technician will be in the office at any time. All additional SkinLab staff are working remotely.
- All technicians will have a bi-weekly COVID-19 test and will wear a fresh set of PPE (including mask and gloves) for each appointment.
- We guarantee that you will be the only person in the waiting room. We ask that you please come to your appointment alone.

If you require any special accommodations, please do not hesitate to call or email us in advance.

Warm regards,

*Joshua Ross*
